# Hassan Kazi

Voice AI Research Engineer · real-time voice agents · Indic speech

Bengaluru, India · open to remote (IST) · hassankazinasik@gmail.com · linkedin.com/in/erhassankazi · github.com/ANDROIDHASSAN · hassankazi.vercel.app

## SUMMARY

Voice AI Research Engineer. I build real-time voice agents and I'm chasing one question: why do voice agents break on real Indian speech, and how do we fix it?

## EXPERIENCE

**Product Developer — AI & Real-time Engineering** · InCruiter, Bengaluru — Jul 2026 – Present

Lead the AI & real-time stack for InCBot (AI video interviewer) and IncScreen (AI phone & WhatsApp screening); scaled to 1,000+ concurrent interviews. Root-caused why multilingual interviews broke: English-only text guards failed on Devanagari (0.39 vs 0.5 match threshold) and Marathi STT hallucinated in 10 of 15 turns; drove script-aware, feature-flagged fixes.

**Software Engineer — AI & Automation** · Anantkamal Software Labs, Nashik

Worked on WhatsApp automation and real-time voice agents. Full-stack MERN development (MongoDB, Express.js, React, Node.js) across multiple projects, including Raise Wademo, Hobbit and Ping Me: frontend implementation, backend API integration, database operations, debugging and feature development.

**Software Developer Intern** · Fuzen.io, Nashik — Sep 2025 – Dec 2025

Shipped 5+ responsive React/JavaScript apps for 4+ clients, cutting page load time by 40%. Refactored 3 legacy codebases, raising SonarQube maintainability scores by 35%.

**AI Engineer** · myRide, Boston, MA · remote — Mar 2025 – Aug 2025

Built a 5,000+ rule Boston parking-regulations dataset for autonomous-vehicle rule validation. Designed a real-time data pipeline and frontend used across 10+ AV models, with a US team.

## PROJECTS

**Own Voice AI Models** · In progress — PyTorch, ONNX, asyncio

My own Hindi/Marathi ASR and TTS models and a LoRA-tuned LLM, joined by a from-scratch streaming orchestrator (VAD, end-of-turn, barge-in); ONNX, INT8, speculative decoding.

**Target:** ~800 ms p50 voice-to-voice, ~5× lower cost/min than hosted APIs.

**InCBot — AI Video Interviewer** · Shipped — Python, LiveKit Agents, Azure OpenAI GPT-4.1 / 4o

STT → LLM (tool calling) → TTS interviewer with feature-flagged guards; Docker CI/CD to LiveKit Cloud via GitHub Actions; runs in 42+ languages.

**IncScreen — AI Phone & WhatsApp Screening** · Shipped — Vapi, Telephony, Webhooks

AI screening calls and WhatsApp interviews with multilingual question sets, 7 Hindi voices, voicemail detection and fluency scoring. Hindi call-quality work: replies took ~5 s vs ~2 s in English, plus cut-off speech and interruptions.

**Planned:** IndicVoiceBench, Hinglish Turn Detector, indic-guard, Bhasha Bridge, Prompt-Injection Guard for Voice Agents, and 13 paper reimplementations in PyTorch. Targets, not results yet.

## OPEN SOURCE · LIVEKIT/AGENTS

**#7740 feat(voice): add bit_rate and constant_bit_rate options to RecorderIO** — Open · in review

Opus VBR made macOS show a 3:32 recording as 6:53+. Adds bit_rate / constant_bit_rate so recordings can match Egress (constant 128 kb/s).

**#7741 fix(voice): don't hang or buffer audio when the recorder encoder fails** — Open · in review

A failed encoder setup made AgentSession.aclose() hang forever and queued audio in memory for the rest of the session.

**#7742 fix(tokenize): ignore stray closing tags in the XML depth check** — Open · in review

A closing tag without its opener drove a depth counter negative and split <emotion> spans across TTS chunks. One-line fix.

## SKILLS

LiveKit Agents · WebRTC · Vapi · STT / TTS · Silero VAD · Sarvam AI · Azure OpenAI · Python · TypeScript · Node.js · React · Docker · Kubernetes · PostgreSQL · GitHub Actions · PyTorch · learning

## EDUCATION

**B.Tech, Computer Science & Engineering** · Sandip University — 2023 – Present

**Diploma, Computer Engineering** · Guru Gobind Singh Polytechnic — 2020 – 2023

## ACHIEVEMENTS & CERTIFICATIONS

- **9× Hackathon Winner**
- **CodeChef 3-Star**: Top 15% globally; 1st in October Long Challenge among 8,000+ coders
- **30+ merged open-source PRs**: Across 15 repos, Hacktoberfest 2022–2024
- **Technical Lead, Leads Community**: 2024 – present · 5+ workshops for 200+ students; 4 hackathons with 1,500+ participants
- **Certifications:** Google Cloud — 5 Skill Badges, Deep Learning with PyTorch, Generative AI Concepts, AI Solutions in Business
