Hassan Kazi

Voice AI Research Engineer · real-time voice agents · Indic speech

Bengaluru, India · open to remote (IST) · hassankazinasik@gmail.com · linkedin.com/in/erhassankazi · github.com/ANDROIDHASSAN · hassankazi.vercel.app

EXPERIENCE

Product Developer — AI & Real-time Engineering · InCruiter, Bengaluru — Jul 2026 – Present

Lead the AI & real-time stack for InCBot (AI video interviewer) and IncScreen (AI phone & WhatsApp screening, which I built from scratch on Twilio and Exotel telephony with Vapi); scaled to 1,000+ concurrent interviews. Root-caused why multilingual interviews broke: English-only text guards failed on Devanagari (0.39 vs 0.5 match threshold) and Marathi STT hallucinated in 10 of 15 turns; drove script-aware, feature-flagged fixes.

Software Engineer — AI & Automation · Anantkamal Software Labs, Nashik

Worked on WhatsApp automation and real-time voice agents. Full-stack MERN development (MongoDB, Express.js, React, Node.js) across multiple projects, including Raise Wademo, Hobbit and Ping Me: frontend implementation, backend API integration, database operations, debugging and feature development.

Software Developer Intern · Fuzen.io, Nashik — Sep 2025 – Dec 2025

Shipped 5+ responsive React/JavaScript apps for 4+ clients, cutting page load time by 40%. Refactored 3 legacy codebases, raising SonarQube maintainability scores by 35%.

AI Engineer · myRide, Boston, MA · remote — Mar 2025 – Aug 2025

Built a 5,000+ rule Boston parking-regulations dataset for autonomous-vehicle rule validation. Designed a real-time data pipeline and frontend used across 10+ AV models, with a US team.

PROJECTS

Own Voice AI Models · In progress — PyTorch, ONNX, asyncio

My own Hindi/Marathi ASR and TTS models and a LoRA-tuned LLM, joined by a from-scratch streaming orchestrator (VAD, end-of-turn, barge-in); ONNX, INT8, speculative decoding.

Target: ~800 ms p50 voice-to-voice, ~5× lower cost/min than hosted APIs.

InCBot — AI Video Interviewer · Shipped — Python, LiveKit Agents, Azure OpenAI GPT-4.1 / 4o

STT → LLM (tool calling) → TTS interviewer with feature-flagged guards; Docker CI/CD to LiveKit Cloud via GitHub Actions; runs in 42+ languages.

IncScreen — AI Phone & WhatsApp Screening · Shipped — Twilio, Exotel, Vapi

Built from scratch: AI screening phone calls over Twilio and Exotel telephony, orchestrated with Vapi, plus WhatsApp interviews. Multilingual question sets, 7 Hindi voices, voicemail detection and fluency scoring. Hindi call-quality work: replies took ~5 s vs ~2 s in English, plus cut-off speech and interruptions.

This site's AI voice clone · Shipped — LiveKit Agents, Sarvam, Deepgram

Talks in English, Hindi or Marathi and switches when you do. Three-deep fallback chains for STT, LLM and TTS; keyterm-prompted STT; per-reply voice routing (Hindi and Marathi share a script, so it reads the reply's words); false-interruption recovery; Krisp noise cancellation; hangs up on silent callers. Five Python files, deployed to LiveKit Cloud by GitHub Actions.

Planned: IndicVoiceBench, Hinglish Turn Detector, indic-guard, Bhasha Bridge, Prompt-Injection Guard for Voice Agents. Targets, not results yet.

Papers from scratch in PyTorch: 7 public with measured results on the site, e.g. Transformer En→Hi 12.7 BLEU, Whisper Hindi fine-tune 138.9% → 49.2% WER, GPTQ 4-bit on Qwen2.5-0.5B.

SKILLS

LiveKit Agents · WebRTC · Vapi · Twilio · Exotel · Telephony (PSTN) · STT / TTS · Deepgram · ElevenLabs · Silero VAD · Sarvam AI · Azure OpenAI · Groq · gpt-oss · LLM tool calling · Prompt engineering · LLM guardrails · Model fallback routing · Python · TypeScript · Node.js · React · Docker · Kubernetes · PostgreSQL · GitHub Actions · PyTorch · learning

EDUCATION

B.Tech, Computer Science & Engineering · Sandip University — 2023 – Present

Diploma, Computer Engineering · Guru Gobind Singh Polytechnic — 2020 – 2023

ACHIEVEMENTS & CERTIFICATIONS

- 9× Hackathon Winner
- **CodeChef 3-Star**: Top 15% globally; 1st in October Long Challenge among 8,000+ coders
- **16 merged open-source PRs**: 7 in LiveKit (agents, python-sdks), plus RealtimeSTT/TTS, Piper and Mastra, since Oct 2026
- **Technical Lead, Leads Community**: 2024 – present · 5+ workshops for 200+ students; 4 hackathons with 1,500+ participants
- **Certifications:** Google Cloud — 5 Skill Badges, Deep Learning with PyTorch, Generative AI Concepts, AI Solutions in Business
